PARIS FASILIONS.

[From the Paris Le Follet] The Zouave jacket still reigns triumphant The Zouave jacket still reigns triumphant in the fashionable world. Those of velvet PERUVIAN GUANO will give place to materials of lighter texture. They are now being made in taffetas, and also in cashmere of different colors-principally China blue, violet and white. The colors used for those of taffetas, are blue, white, rose, maize, and any one of the lighter shades, so that it harmonizes with the rest of the toilette. The black taffetas Zouave is always simple and pretty, and has the advantage of being quite free from any eccentricity of appearance. These jackets are no longer quilted, but simply lined with taf-fets of a contrasting shade. Thus, the black or white, with colored silk; the colored, white. The lining is bordered with a narrow ruche of the same color, generally placed so that it shows a little beyond the edge, and the outside has a trimming of narrow guipure round it, which falls over the ruche. The embroideries of gold or silver, give to these a more particular style, which many ladies do not admire. A little later in the season we shall find them made in muslin, for summer dresses. We even now meet with them in lace for soirees or for dinner dress. Round the foundation, which is generally of tulle, is a broad lace, falling over

the dress, forming a flounce or ruche. The

sleeves are made very large and opened up,

with ruche, but for demi-toilets some wear

them opened in front, but not far down.

Skirts continue to be trimmed with a number of narrow flounces, or with a wide one, having several narrow as a heading. A rather novel style of trimming is that of narrow flounces, parted at the bottom of the skirt, and taken up to the waist between each breadth. In taffetas, of rather a deep shade, this looks very well. Until the warm weather obliges us to resort to open sleeves again, they will continue to be worn tight, closed to the wrist or rounded, and left just open to the elbow, the upper part being ensuite with the dress, plain, with bouillons, jockeys, epauletts, &c. We are bound to record that the rage for gold trimmings rather increases than diminishes. It is seen, not only on dresses, but on bonnets. However, most women of taste think it too showy in appearance when used for widening, and SOLUBLE form. content themselves with rich silk passe- Price \$50 per Ton of 2,000 lbs. menteries, and handsome laces. The Spring bonnets prepared by our principal modistes, give evidence of a growing taste for simplic-ity, without, however, showing any diminution of elegance. Silk capotes, covered with will ere long be altogether used in this section, as black or white lace, tulle boullione are the a substitute for the Peruvian Guano, which, withprelude to leghorn and straw bonnets as usual. We have seen an elegant white crape bonnet, the front and curtain bouillonne without any trimming than a sprig of pink rhododendron, and another still in bud. When this flower is worn on the bonnets-and it is very fashionable just now-we may mention that it is made much smaller than the natural flower. Yellow stocks, lilac, and hawthorus are favorite flowers for straw bonnets. Very pretty capotes are being made, partly of leghorn and partly of silk; the and of drawn silk. These are trimined either with ruches of silk, a simple bow, or a small boquet of flowers.

ARE WOMEN NATURALLY POLITE? BY MRS. GEORGE WASHINGTON WYLLYS.

Now we don't like to turn State's evidence real sentiments on the matter? Bless the growing crop, giving it ample luxuriance, and leave ladies, we know 'em better than to incur their vengeance, when a little hypocrisy will keep us on the safe side. But nobody has said that we mustn't ask

questions, and so we can take the Yankee method of managing matters. Are women naturally polite, did you ask, dear, good-natured Public?

Did you ever know a woman to make room in an omnibus, five on a side, when Number Six was entering, flounced and velveted, until ordered by the Driver?

Did you ever know a pair of little gaiter boots to turn one inch either to the right or the left, when they could have saved you from a streaming gutter by the operation?-Patent leathers don't behave so -not they!

Did you ever know a woman to say, "I am sorry to have given so much trouble," when the dry goods clerk had turned the store topsy turvey, without finding the right shade of a color that never existed!

Did you ever know a woman who didn't think it was "outrageous" for another woman to travel with a baby; or who didn't varied assortment of regard it as "cruel and barbarous" if any FARMING IMPLEMENTS, one objected to the crying of her baby? Did you ever know two women to talk over

a third without ridiculing her, even if she was their "dear particular friend?" Did you ever praise one young lady in the PLOWS AND CASTINGS,

presence of another, without being confidentially told of some enormous fault or deformity in the former, which you hadn't dreamed of? Did you ever tell your wife what a beau-

tiful new dress her neighbor had got, without learning that "it was only that dowdy old silk dyed over?" Did you ever know a pretty woman to

make an impression, without a half a dozen other pretty women ruining the effect of it the instant she 'eft the room?" Did you ever know a woman to apologize

for having knocked another woman's bonnet into "pi" (that's a printerism, but expressive, notwithstanding,) with the corner of her parasol?

Did you ever hear of a woman who had any idea that she was making trouble by her

little airs and graces? We don't believe you ever did, reader!-They are a race of unaccountables, these women, just as sweet and piquant as June roses sometimes, and then, again, bristling

like so many small venomous thorn bushes. There's one thing we've never ceased to be inwardly thankful for-that we're not a man, and consequently obliged to marry be furnish the BEST FINE GROUND WINDSOR PLASTER, one of 'em?

TO THE TOBACCO GROWERS OF MARY LAND AND VIRGINIA .- As there appears to be great dissatisfaction about the sale and inspection TOBACCO in the City of Baltimore, I will say to all, who feel interested, that I am now inspecting of TOBACCO in the corporation Tobacco Warehouse, in the City of Washington, D. C., and that those who feel disposed to patronise this Warehouse can do so , and have the same facilities to sat their TOBACCO as in Baltimore. I am authorized to say by some of the largest dealers and shipping houses in Baltimore, that if the Planters will bring their Tobacco and have it inspected in this Warehouse, they will regularly visit here to purchase all TOBACCO that may be inspected here; and further that they will purchase by the sample drawn here, in Baltimore. This arrangement has already been entered into. TOBACCO can be braught here by water or land, as the Warehouse is near Blagden's wharf, where there is Twenty foot water not fifty steps from the Warehouse. Persons can inspect their own Tobacco or have it done at small cost with dispatch. Any communication addressed to me for information will be re- | LAMPS, White Shades, Extra Chimneys, plied to with dispatch, and all necessary informa- Wick, &c. Every Lamp warranted to give satis tion given. I want it to be understood that this is faction, or money returned. Old Lamps altered no humbag. This warehouse will hold 2,000 hbds. to burn Coal Oil, on reasonable terms. JOHN E. DEMENT, Tobacco Inspector,

Washington City, D. C. Washington, ap 13-2m

SOLUBLE PHOSPHATE, Commonly known as EXCELSIOR DEBURG,

CONTAINING Ammonia, 6 per ct.; Phosphates, 57 per cent., composed of 700 pounds of No. 1 PERUVIAN GUANO, and 1300 pounds of SO-LUBLE PHOSPHATE OF LIME, Potash, Soda, and Magnesia, forming the most concentrated and durable FERTILIZER ever offered to the Farmer, combining all the stimulating properties of Peruvian Guano, and the durable fertilizing properties of Ground Bones-supplying an abunance of Ammonia for any crop and all soils, and in a perfectly fixed condition-not volatile, and passing off with the first crop as with Peruvian and other Ammoniacal Guanos, but stimulating the crop to which it is applied, and all succeeding ones, giving to poor, worn out and unproductive s ils, new life and vigor.

It furnishes to the soil Soluble Phosphate of

Lime, (Bones dissolved in Sulphuric acid) in a perfectly available form, ready food for the plant at once; a fact of great importance to the Farmer; as the immediate action and efficacy of all manures, depends entirely upon the solubility of their Phosphates. Bones are alone used in the manufacture of this article, avoiding altogether the use of the so-called Phosphatic Guanos, a considerable portion of whose Phosphates are of Iron and Alumnica, which are utterly valueless to the

The EXCELSIOR also supplies to the soil, Potash, Soda, and Magnesia, which are extracted from it in the growth of all plants; and must be returned, or the soil will become impoverished and exhausted, notwithstanding the application of Guano and other Manures deficient in Alkalies. This article has been tested for several years past with Peruvian and other Guanos, and now ranks with those who have used it, as a first class

Manure for any crop common to this region. Numerous certificates to that effect furnished on ap-Every package is warranted to be uniform in quality, and to contain by analysis, the standard of fertilizing properties. Farmers should see that every package bears in red letters the name of J. J. & F. Turner, under
